

## Marriage Sabbatical

JOHN 15:2

Submitting to God's pruning can be painful. Yielding requires persistent faith. We must hold tightly to God's character with tears in our eyes. But our Master Gardener is trustworthy. He loves us too much to elevate looking good above *being* good. With each cut of His "pruning knife," God thins our lives in order to thicken our character.

- Learn that marriage is historical, political, social, spiritual
- Learn the models of living in a contented, problem-solving, joyful marriage
- Practice discovering and managing marital communication

Created by a long-term married Christian wife

# OVERVIEW OF GOALS

## EDUCATION

This course is for Christians who accept the entire Word of God. Thus, the course is biblically based. Ideally, we all are striving to die to self and to gain the beauty of Holiness. Getting in touch with our myths, fantasies and *realities* of marriage are part of this process.

## PRACTICE

This course assumes some marital couples/individuals **who want to discuss/work/practice/invest in** marriage beyond prose and small group (in class-room). The course promotes use of observations, dreams, and personal images to be developed and shared with the spouse and to chronicle the process with your spouse.

## LIVE

This course appreciates human communication as an ongoing process that is an extension of the individuals.
